### Notes:
- Prices are not adjusted for inflation. See "Nominal Price" in Glossary.
- Commercial sector: For 1960–2002, prices exclude public street and highway lighting, interdepartmental sales, and other sales to public authorities, public authorities, agriculture and irrigation, and transportation including railroads and railways.
- Transportation sector, including railroads and railways.
- Prices are calculated by dividing revenue by sales. Revenue may not correspond to sales for a particular month because of energy service provider billing and accounting procedures.
- Revised. NA = Not available. -- = Not applicable.
- **Note:** Beginning in 2003, the category "Other" has been replaced by "Transportation," and the categories "Commercial" and "Industrial" have been redefined.
- Prices are calculated by dividing revenue by sales. Revenue may not correspond to sales for a particular month because of energy service provider billing and accounting procedures. That lack of correspondence could result in uncharacteristic increases or decreases in the monthly prices.
- Prices include state and local taxes, energy demand charges, customer service charges, environmental surcharges, franchise fees, fuel adjustments, and other miscellaneous charges applied to end-use customers during normal billing operations. Prices do not include deferred charges, credits, or other adjustments, such as fuel or revenue from purchased power, from previous reporting periods.
- **Through 1979, data are for Classes A and B privately owned electric utilities only. (Class A utilities are those with operating revenues of $2.5 million or more; Class B utilities are those with operating revenues between $1 million and $2.5 million.) For 1980–1982, data are for selected Class A utilities whose operating revenues were $100 million or more during the previous year. For 1983, data are for a selected sample of electric utilities. Beginning in 1984, data also include energy service providers selling to retail customers.** • See Note 7. "Electricity Retail Prices," at end of section for plant coverage, and for information on preliminary and final values.
- Geographic coverage is the 50 states and the District of Columbia.
