Title: NATCARB_Coal_10K (v1501)

Originators: National Carbon Sequestration Database and Geographic Information System (NATCARB), US Dept of Energy (DOE) National Energy Technology Laboratory (NETL)

Publication date: 20150415

Edition: v1501

Data type: vector digital data

Data location: http://www.netl.doe.gov/technologies/carbon_seq/natcarb/download.html

Other citation details: http://www.netl.doe.gov/technologies/carbon_seq/natcarb

Abstract: The National Carbon Sequestration Database and Geographic Information System (NATCARB) Coal spatial database is a small-scale (large-area) overview of carbon dioxide (CO2) geologic storage potential in unmineable coal areas across the USA and parts of Canada. This data layer reflects the best available knowledge regarding the location of carbon sequestration potential in the USA and Canada, both onshore and offshore.

Version Log:
- v1101 - Initial release for Atlas III.
- v1103 - Updated data for WESTCARB. Metadata revised.
- v1104 - No changes to coal layer.
- v1204 - Initial release for Atlas IV. New data submitted by all regional partnerships.
- v1302 - No changes to coal layer. Metadata revised.
- v1303 - No changes to coal layer.
- v1403 - Initial release for Atlas V. No new data submitted. Corrections made to resource names in WESTCARB. Missing Medium volumes calculated as natural log mean of Low and High volumes.
- v1501 - No changes to the coal layer.

NATCARB is administered by the US Dept. of Energy (DOE) National Energy Technology Laboratory (NETL) and contains data provided by several Regional Carbon Sequestration Partnerships (RCSP). RCSPs originally developed the data per individual geologic storage resource, or as continuous surface models, and then converted these data into a 10 km X 10 km vector "grid". The NATCARB Team at the Kansas Geological Survey compiled the regional datasets into a single, seamless layer.

Purpose: This dataset provides a single, seamless spatial database of carbon storage potentials for unmineable coal areas across the USA and parts of Canada compiled from regional datasets created by the RCSPs. Storage resource estimates are based on physically accessible CO2 storage pore volume within subsurface geologic formations, and on the assumption that the storage reservoirs are open systems in which in situ fluids will either be displaced from the injection zone or managed accordingly. Economic and regulatory constraints are not considered. These data are intended to be used as an initial assessment of potential geologic storage and are not a substitute for site-specific assessment, testing, and geologic investigation. This spatial data layer provides carbon capture and storage (CCS) project developers a starting point for further inquiry into CCS technologies aimed at reducing CO2 emissions and is intended for use by RCSPs, project developers, and governmental entities for regional- and national-scale assessments of potential CO2 storage resources in the United States and parts of Canada.

Supplemental information: For a detailed methodology of storage resource estimates refer to Appendix B of The United States 2014 Carbon Utilization and Storage Atlas - Fifth Edition (Atlas V). For data access please contact the US DOE-NETL NATCARB Map Team - NatCarb.Maps@netl.doe.gov For questions regarding how the data were assembled, contact the KGS NATCARB Team - natcarb@kgs.ku.edu

Dataset credit: Version 1501 (first quarter release of 2015) of the NATCARB Coal spatial database was created by the NATCARB Team at the Kansas Geological Survey (KGS). The following Regional Carbon Sequestration Partnerships (RCSP) contributed data to the national dataset:
- Big Sky Carbon Sequestration Partnership (BSCSP);
- Midwest Geological Sequestration Consortium (MGSC);
- Midwest Regional Carbon Sequestration Partnership (MRCSP);
Plains CO2 Reduction Partnership (PCOR); Southeast Regional Carbon Sequestration Partnership (SECARB); Southwest Regional Partnership on Carbon Sequestration (SWP); West Coast Regional Carbon Sequestration Partnership (WESTCARB).

Several site characterization project teams also contributed data through the RCSPs to be included in the national dataset:

- Black Warrior Basin - University of Alabama;
- Cambro-Ordovician Strata of the Illinois and Michigan Basins - University of Illinois;
- Gulf of Mexico Miocene - University of Texas;
- Triassic Newark Basin of New York and New Jersey - Sandia Technologies;
- Ozark Plateau Study Area - University of Kansas;
- Rocky Mountain Region - University of Utah;
- South Georgia Rift Basin - South Carolina Research Institution;
- Two Elk Energy Park - North American Power Group;
- Wilmington Graben, Offshore Los Angeles - Terralog Technologies USA;
- Wyoming - University of Wyoming.

**SDTS Feature Description**

*Spatial data transfer standard (SDTS) terms*

*Feature class*
Data Quality and Accuracy Information

General

Logical consistency report: All RCSPs provided carbon storage data in accordance with common standards developed by the RCSPs and the NATCARB project teams. (See Sources for more information on methodologies). Discrepancies and overlaps occur at the boundaries of some adjacent partnerships and DOE-NETL is the final authority on the handling of these issues (see data fields OVERLAP and DUPLICATE in Entity Attributes section of this document for details).

Completeness report: This dataset reflects the best available knowledge regarding the location of potential carbon sequestration potential in the USA and Canada, both onshore and offshore. However, not all areas of the United States and Canada have been assessed (e.g., offshore New England). Not all RCSPs provided data for all attribute fields in the database (indicated by <Null>). Values of "0" represent actual measurements. Not all RCSPs provided low (VOL_LOW), medium (VOL_MED) and high (VOL_HIGH) estimates of carbon storage capacity. In cases where only medium estimates (VOL_MED) were provided, the medium capacities were copied into the VOL_LOW and VOL_HIGH attribute fields. If the RCSP provided low and high estimates of capacity but not medium, the VOL_MED field was calculated as the natural log mean of VOL_LOW and VOL_HIGH.

Attribute Accuracy

Attribute accuracy report: Questions regarding accuracy of the data (spatial and attribute) should be directed to the individual RCSPs. Except for certain cases of inter-partnership overlap, NATCARB did not make any changes to the data except for corrections to values in text fields (spelling, capitalization, etc.) when errors were noticed.

Data Source and Process Information

Data Sources

Title: Two Elk Energy Park Carbon Site Characterization Project
Originators: North American Power Group, Ltd.
Media: None
Source contribution: No data submitted for this version of the Atlas.

Title: MGSC Carbon Sequestration Potential
Data type: vector digital data
Media: None
Source contribution: Midwest Geological Sequestration Consortium provided data for Illinois, Western Indiana and Western Kentucky.

**TITLE:** MRCSP Carbon Sequestration Potential

**ORIGINATORS:** Midwest Regional Carbon Sequestration Partnership
Batelle Memorial Institute

**DATA TYPE:** vector digital data

**DATA LOCATION:**

**MEDIA:** None

**SOURCE CONTRIBUTION:** Midwest Regional Carbon Sequestration Partnership provided data for the Ohio Valley and Northeastern United States (Eastern Indiana, Eastern Kentucky, Maryland, Michigan, New Jersey, New York, Ohio, Pennsylvania and West Virginia).

**ROCKY MOUNTAIN**

**TITLE:** Characterization of Most Promising Sequestration Formations in the Rocky Mountain Region

**ORIGINATORS:** University of Utah

**DATA TYPE:** vector digital data

**DATA LOCATION:**
http://www.netl.doe.gov/publications/factsheets/project/FE0001812.pdf,

**MEDIA:** None

**SOURCE CONTRIBUTION:** The University of Utah contributed data for the Weber Sandstone saline resource in Colorado.

**WILMINGTON GRABEN**

**TITLE:** Characterization of Pliocene and Miocene Formations in the Wilmington Graben, Offshore Los Angeles, for Large Scale Geologic Storage of CO2

**ORIGINATORS:** Terralog Technologies USA

**DATA LOCATION:**
http://www.netl.doe.gov/publications/factsheets/project/FE0001922.pdf,

**MEDIA:** None

**SOURCE CONTRIBUTION:** No data submitted for this version of the Atlas.
**SECARB**

**Title:** SECARB Carbon Sequestration Potential  
**Originators:** Southern States Energy Board  
Southeast Regional Carbon Sequestration Partnership  
**Data type:** vector digital data  
**Data location:** http://www.secarbon.org/, http://www.netl.doe.gov/technologies/carbon_seq/infrastructure/rcsp.html  
**Media:** None  
**Source contribution:** Southeast Regional Carbon Sequestration Partnership provided data for the Southeastern United States (Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Eastern Texas, West Virginia and Virginia).

**GOM MIOCENE**

**Title:** Gulf of Mexico Miocene CO2 Site Characterization Mega Transect  
**Originators:** University of Texas at Austin  
**Media:** None  
**Source contribution:** No data submitted for this version of the Atlas.

**KGS**

**Title:** KGS NATCARB  
**Originators:** Kansas Geological Survey NATCAB Team  
**Media:** None  
**Source contribution:** As the primary entity responsible for compiling the NATCAB layers, the Kansas Geological Survey NATCAB Team worked closely with the DOE-NETL NATCAB Team to develop rules and methods for assembling the composite datasets.

**SWP**

**Title:** SWP Carbon Sequestration Potential  
**Originators:** New Mexico Institute of Mining and Technology  
Southwest Regional Partnership on Carbon Sequestration  
**Data type:** vector digital data  
**Data location:** http://www.netl.doe.gov/technologies/carbon_seq/infrastructure/rcsp.html/, http://www.southwestcarbonpartnership.org  
**Media:** None  
**Source contribution:** Southwest Regional Partnership on Carbon Sequestration provided data for the Southwestern United States (Eastern Arizona, Colorado, Kansas, New Mexico, Western Texas and Utah).

**OZARK PLATEAU**

**Title:** Modeling CO2 Sequestration in a Saline Reservoir and Depleted Oil Reservoir to Evaluate The Regional CO2 Sequestration Potential of The Ozark Plateau Aquifer System, South-Central Kansas  
**Originators:** Kansas Geological Survey  
University of Kansas  
**Data type:** vector digital data  
**Media:** None  
**Source contribution:** The University of Kansas contributed data for the Arbuckle saline resource in Kansas.

**Atlas V**

**Title:** The United States 2014 Carbon Utilization and Storage Atlas  
**Originators:** US Department of Energy - National Energy Technology Laboratory Carbon
Sequestration Program

**Publisher:** US Department of Energy - National Energy Technology Laboratory

**Edition:** Fifth

**Data location:** http://www.netl.doe.gov/technologies/carbon_seq/refshelf/atlasV/

**Other citation details:** http://www.netl.doe.gov 1-800-553-7681

**Media:** onLine

**Source contribution:** The United States 2014 Carbon Utilization and Storage Atlas - Fifth Edition (Atlas V) provides updated information regarding carbon dioxide storage potential in the US and Canada and includes maps, summary tables and, in Appendices A and B, detailed methodologies.

---

**DOE-NETL**

**Title:** DOE-NETL

**Originators:** US Department of Energy (DOE) National Energy Technology Laboratory NATCARB Team

**Media:** None

**Source contribution:** As the responsible authority for the National Carbon Sequestration Database and Geographic Information System (NATCARB), the US Department of Energy (DOE) National Energy Technology Laboratory (NETL) NATCARB Team provided data, methodological guidance and expertise in handling issues specific to creation of the composite NATCARB data layers.
